CURRICULUM - SOFTWARE TESTING

EduBridge is a skill development and vocational training organization started by a group of IIM alumni and professors in October 2009, with Registered Office in Kolkata and Head Office in Mumbai. It has been setup with the vision of fulfilling the skill gap that exists currently between semi-urban/economically backward youth and the skill requirements of the high-performing companies/government organizations.

EduBridge is proud to be partner of National Skill Development Corporation (NSDC), a Govt. of India organization, and participate in the mission of up-skilling India's rural and semi-urban youth. EduBridge is also backed by a well-known venture capital company – Acumen Fund, which invests in firms that create a social impact.

Learning by Doing

The learning happens by doing -> for every topic the concepts are explained with a mix of theory and production quality code. In the end of the program, you will be able to:

- Explore the different SDLC models and understand their advantages and drawbacks.
- Analyze and explain the behaviour of simple programs involving the fundamental programming constructs like assignment, I/O (including file I/O), selection, iteration, methods, exception handling and multithreading in Java with Eclipse.
- Demonstrate working with primitive data types, strings and arrays in Java with Eclipse.
- Ability to plan testing projects, design test scenarios, test cases managing defects and generating various test reports.
- Implement testing process using likely tools, such as- ALM (quality center) and JIRA.
- Demonstrate automation testing with Selenium Web Driver through interactive hands-on learning.
- Demonstrate how to use Jmeter for analyzing and measuring the performance of different software services and products
- Automate a web application using Selenium WebDriver, Mavens and Jenkins.
- Find vulnerabilities in web application using ZAP, an integrated penetration testing tool.

Employability Skills

- Build team work and communication skills at workplace.
- Maintain etiquette with seniors/ male/ female colleagues.
- Understand the importance of non-verbal skills and listening skills.
- Know the importance of sharing work related information.
- Developing good interview skills by understanding the interview process.
- Handling queries over e-mail.

- **Agile Model and Methodology**
 - Explore the different SDLC models and know why Agile model and its methodology is preferred by most of the companies
 - Identify the difference between SCRUM and Kanban work methods

- **Core Java Programming**
 - Gain knowledge about basic Java language syntax and semantics to write Java programs and use concepts such as variables, conditional and iterative execution methods etc.
 - Understand the fundamentals of object-oriented programming in Java, including defining classes, objects, invoking methods etc and exception handling mechanisms.
 - Understand the principles of inheritance, packages and interfaces

Selenium IDE

- Demonstrate browser testing using Selenium Webdriver
- Handle Alerts, Java Script Alerts and Pop Boxes
- Switch Frames using Selenium Webdriver

Introduction to TestNg

- Install TestNG in Eclipse
- Learn database Testing Using Selenium
- Explore the different Frameworks in Selenium
- Install Maven and use it with TestNG
- Schedule Jenkins for Automation Execution
- Use Jenkins without Maven

Test Management Tools

- Approach to the development, operation, maintenance, and retirement of software
- Use available resources to develop software, reduce cost of software and how to maintain quality of software
- List Methods and tools of testing and maintenance of software
- Apply modern software testing processes in relation to software development and project management.
- Create test strategies and plans, design test cases, prioritize and execute them.
- Manage incidents and risks within a project.
